

Beep*

The most beautiful part of the Day from 12 till 2 It's all about her Smile

Out of a dead corner Boop* meets Beep*! Wow! So sudden, he can't focus. If next time he'll see her and she smiles, the sun will shine in. And finally he will kiss that woman to a dazzling cosmic realm. Next door boy and girl against a sacred background.

Noon

1. When her Smile breaks through
2. The Kiss
3. Cosmic Realm
4. The Sacred Background

When her Smile breaks through

Sweet November

Out of a dead corner, she appears before me
So sudden, I can't focus & see through her Face
Did you hear our song **Beepielove***? Is what escapes my lips
No. And off the charts the tune skyrocketed!

Then silence filled the empty launch pad
Again. And I don't know how to reach such heights
You is and are my Woman, **Beep***
But this morning I can't believe we will ever meet again

Sweet Februari

Though. All I have to do is say the words, that simple
All I have to do is pronounce my wish, that is His command
And the wind will breathe the message that will find you
And the electric waves will wash your full presence to my shore

Like if we were to meet you'll rise before me
I'll see a Smile pierce through your face, and Focus
The Sun will shine in its harmonic rays, **Beepielove*!**
Yes. And on the charts you land!

The Kiss

So washed ashore she'll smile from ear to ear
Still wet and a little new in this sudden encounter
We walk along from the beach into this cheerful town
In the hum of the masses we frolic in our own soundscape

And then some soft town's corner
We can call our place for a day
A day in a life the way they should always be
A fantastic summer Noon with tea and cake
Splash-painted by Beep*'s colourful sexy skirt
Here Beep* and Me* explore the tasty French kiss

Well, that is what we want, what we always wanted
But didn't dare to do back then
Waiting for the elevator in those everlasting seconds
We held in to await the right moment
that should come in better times
And better times and place are Here

So shortly after the war
We survived the longest days
The streets are full of people in euphoria
Busy with their own cheerful business

A tongue reaches a tongue
A beautiful architecture of
Mapped out little kisses come next
And they follow the intriguing necklines

Up to her beautiful hair that I sniff so gently
Her hair that wants to be involved
In the cheek 2 cheek caresses
Overstepping noses that curiously lead to our lips again

And in the short gaps in time of split seconds
The four green eyes catch one another
Wow, Beep* & Boop*! No shame
What are you two doing?!

Where will this bring you naughty two?
You opened the gate to the Unknown!

Cosmic Realm

Somewhere in the outer lands of the Night sky
Higher than higher grounds resides a Realm
Stretching further than imagination tells
Even to step in needs courage
I now not know I have

Only by surrendering & matching souls
The Realm encloses as a beautiful Shell
No need of pure hearts but to overstep the fears
Just giving in to the mere hope that all ends well

And a timeframe of unforeseen events
Starts running an unwinding flywheel
That only stops spinning when He calls it a day
Mere Gratitude is the end of the line

May this radiate endless energy
to strangers who know & loved ones who don't
So take me by the hand Beep*
And this is definitely going to be a different book

And I know I'm a boy and I know you're a girl
Just ordinary citizens in a man made world
I talk about wonders in a stone square yard
Forgive me my philosophies when you shine so bright

Release me from my chains and I make you loose
A hand in a hand should be enough for us
To walk away from here to never return
And be happy with the turns in the road that lie ahead

The Sacred Background

The girl shines diamonds through her eyes
She chose to land next to me

As I invited her to step in the magical woods
To go as far as she can see & take me by the hand
In the end we reach the last trees... That root in nothing

The girl shines diamonds through her eyes
She chose to be next to me

Here at the horizon our stone yard touches the night sky
Our daily lives seem so concrete, yet they stretch into the vast abstraction
The ever so far away Background starts... Where the Ordinary world fades

The trees at the rim carry the heavens as a ceiling
A stunning beauty this stone Temple is
The altar leads our eyes to the background
Through a window the ancient light enters the daily life

The simple lives of Beep* & Boop*
Are we just boy & girl next door
The ancient light makes us glow
As prisms we shine in each other's faces

Everything that glows
Is a reflection of this Sacred Background
I know without the glow
We are ordinary people

The ordinary daily life
Is the safe haven
A garden fenced by the extraordinary World
So easy to perceive

Within this one Day life
It is Beep* I want beside me
For no good reason But
The light in her eyes, her soul and eyes

The girl shines diamonds through her eyes
She chose to land next to me
